Biodegradable Sticky Tape

Description

Naikos Biodegradable Cellophane Adhesive Tape is complied with the ongoing environment-protecting philosophy of 'Biodegradable, Recyclable, Gas-to-Water,Environment-Centered' and the safety belief of 'Low-noise and Static-free' which is proposed by the government. Reproducible cellulose film, also known as 'cellophane', is used as carrier and be coated with eco-friendly water based biodegradable adhesive.

Construction

Features

- * Biodegradable adhesive tape eco-friendly and biodegradable
- * Excellent tensile strength for strong packing
- * Could be recycled along with used paper
- * Excellent weather resistance, low-noise, and static-free
- * Biodegradable sticky tape writable and custom printable
- * Adaptable to high and low-temperature environments.

Application

Packing of various of goods, cartons, express packages,etc.

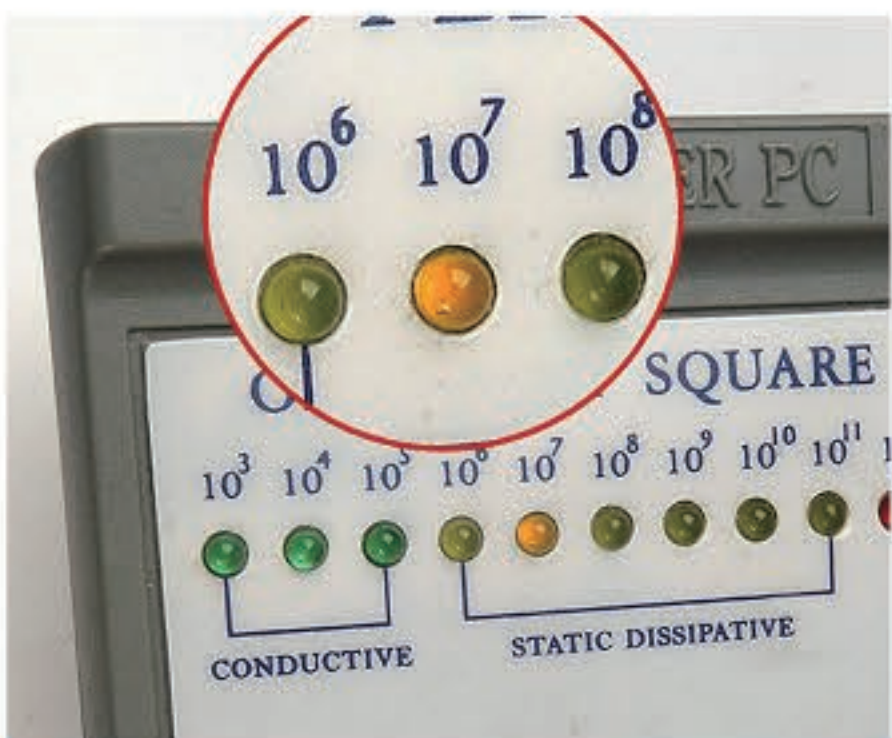

Excellent Tensile Strength
High Temperature Resistance

Strong Adhesion
Good for Packing

Writable, Printable
Customizable

Excellent Anti-static Performance
Applicable for Electronics Packing

Tore by Hand Vertically
Convenient to Use

Eco-friendly, Recyclable
Biodegradable

Properties

Item	NKS-55CTQ
Color	Clear(Mulit-Colors and printing available)
Carrier	Cellulose Film
Adhesive	Water Based Biodegradable Adhesive
Release Liner	N/A
Total Thickness	0.055 mm(2.2 mil)
Adhesion to Stainless Steel	7 N/25mm(24.7oz/inch)
Holding Power	≥48 Hrs
Remark	Eco-friendly / Reproducible / Biodegradable / Anti-static
